

## **Perfinned Errors and Flaws – Bulletin 339/11**

**Brian Birch** sent me [Ed] a batch of perfin articles and one was taken from the Swiss Philatelic Journal (Issue 12 - December 1973). This was a piece on an imperforate block of twelve, 3p Machin with the perfin BC– exact die is unclear but is probably B1110.03M. The block was auctioned at Harmers in London for £250. It appears that the mailroom of Bradford Council applied the BC die to a partially imperforate sheet before realising its potential value. Having realised that the sheet might be valuable the sheet was sent to the auctioneer.
